Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

1) Responsive to communication(s) filed on _____.

DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, it is not clear what process steps are being positively claimed. In claim 1, line 3, what's happened to the 'organic or inorganic materials' noted in line 2? There is no proper antecedent basis for 'the layers' in claim 3. Claim 15 is an apparatus claim and should not depend on a method claim. In claim 15, what elements are being positively claimed?

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

As best as can be understood, claims 1-7,9,11 are rejected under 35 U.S.C. 102(b) as being anticipated by Engel et al. This patent shows the breaking/separation of composite material within a housing with a rotor.

As best as can be understood, claims 15,16 are rejected under 35 U.S.C. 102(b) as being anticipated by Sims et al. This patent discloses the breaking/separating of composite material in a housing with a rotor.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

As best as can be understood, claims 8,10,12-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Engel et al. The limitations of these claims would have been obvious process steps once the basic process was known as in Engel et al. For example, heat treating prior to breaking and separating non-ferrous metals from a comminuted material are well known in the art and of no patentable merit.

As best as can be understood, claims 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sims et al. the limitations of these claims would have been obvious modifications once the basic apparatus was known as in Sims et al. For example, using projections on both wall surfaces would have been obvious once the use of projections on one surface was known as in Sims et al i.e. both configurations would perform the same results.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
